

- **Keep the pistol high and keep your head up**
- **Use your peripheral vision to see the pistol and track the threat**

- **Use force when seating the magazine**
- **Always work the action even if the slide goes forward on "Tap"**

- **'Click' instead of 'bang' on a trigger squeeze**
- **Stay calm, move, seek cover while clearing the malfunction**

- **Visually check the chamber to determine how bad the malfunction is**

- **Always complete the clearance cycle by driving the pistol back out to full extension**
- **Reacquire the threat or maneuver if you have lost the threat location**

TAP ~ RACK ~ READY

PISTOL BASIC MALFUNCTION CLEARANCE

'CLICK INSTEAD OF BANG'

- **Pull the pistol straight back into your work space**
- **Visually verify the malfunction**

TAP

- **Strike the magazine base to seat it**

RACK

- **Pull the slide all the way to the rear**
- **Watch for anything to exit the chamber**
- **Don't ride the slide, let it slam forward**
- **Ensure the slide goes all the way forward**

READY

- **Drive the pistol back out onto the threat**
- **Re engage the threat**
